

**AE Manufactures Test bench units
Which can be used for several
Application of which few are mentioned below.**

- Testing induction motors
- Testing of transformer
- Testing of Analog & Digital meters
- Testing of electrical devices like MCB, MCCB, ACB etc

The test benches are coupled with
Our own make Dimmerstats,
Stabilizer or Current Injection
Test kits for carrying out the tests like :

- No load test
- Full load test
- Short circuit test
- Temperature rise test
- Operating characteristics etc.

Ordering information

- Unit under test
- Complete technical specifications of the unit under test.
- Mechanical dimensions of the test bench desired
- Type of meters reqd- Analog / Digital
- Any other specific features
